

Partner with **the best**

World leading **mission critical
push-to-talk over cellular solution**

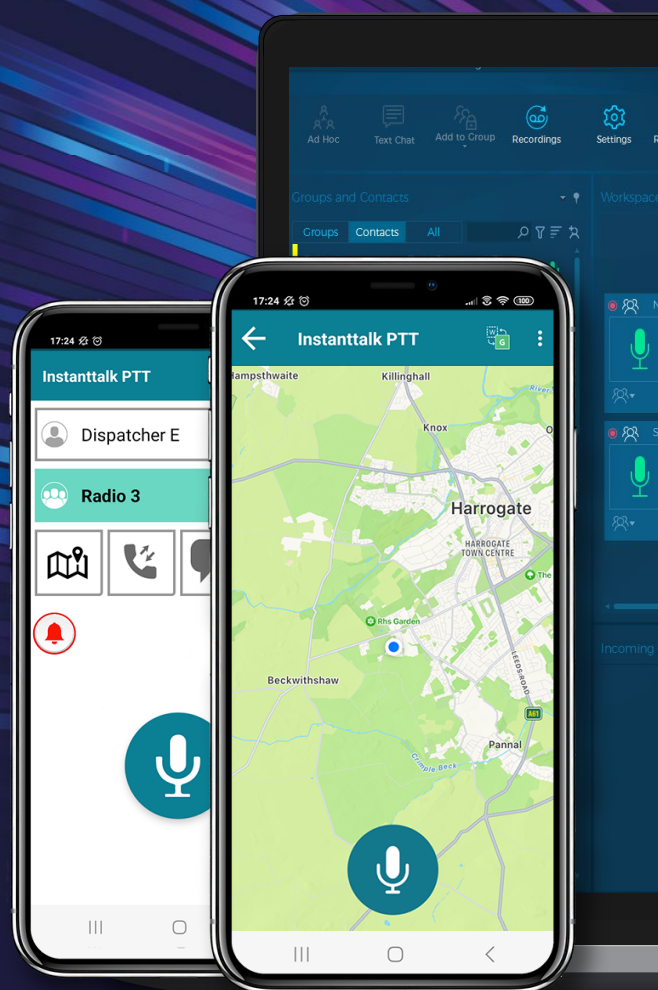

A reliable & robust alternative to two-way radios

The growth in mobile network coverage has accelerated the transition from legacy radios to push-to-talk over cellular. The days of having to rely on traditional LMR radio networks are over.

With more than 20 years of experience in mission critical communications, you can feel confident that Mobile Tornado's carrier-grade push-to-talk over cellular and workforce management technology is superior to any other PTTToC solution on the market.

With availability of 99.999 per cent, Mobile Tornado's technology is market leading. And it's not just about availability. Users are waking up to the expanded feature sets and superior user experience of push-to-talk over cellular compared to the limited capabilities of legacy radio systems.

PTTToC technology increases safety, boosts productivity, improves efficiencies and can also provide significant cost savings.

World-leading push-to-talk over cellular

More and more partners are choosing to sell Mobile Tornado's world-leading push-to-talk over cellular technology instead of an alternative PTTToC solution.

Here's why:

-  **Seamless switching** between broadband networks.
-  **Instant communications** between individuals and groups of up to 5,000 participants with a single push of a button, anywhere in the world.
-  Robust **dispatch console** to manage remote workforce and supporting up to 64 simultaneous PTTToC radio group sessions.
-  Exceptionally **low latency**.
-  **PTT** Mobile Device Management.
-  Ability to send **emergency alerts** and track and **locate employees** in real time.
-  **Integrated** PTTToC and workforce management.
-  Low monthly data consumption.
-  SaaS and on premise.
-  Superb post-sales support.

We value our partners

We know how important our partners are to our business. We listen to your needs and the needs of your customers to ensure that we do everything in our power to make our solution the best choice for your business.

It's also why we invest time in on-boarding new partners. When you become a Mobile Tornado partner we will invest as much time as you need training you and your sales team to find out about and demonstrate our technology.

We can also provide you with a range of sales support material, including sales presentations, videos, brochures and PDFs, all bespoke to your company's branding.

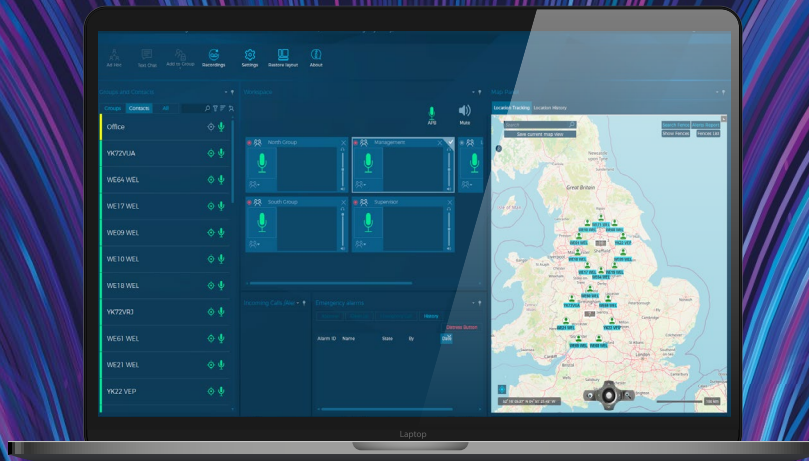

You will also be allocated an account manager to provide you with on-going support, so that help is on hand whenever you need it.

“The collaboration with the Mobile Tornado team throughout the implementation of the new technology was exceptional. They were fantastic to work with and provided unwavering support at every stage of the introduction of the new technology. Our employees have embraced the solution which is highly intuitive and user-friendly.”

Damian Ives, Chief Operating Officer at Leeds Bradford Airport
