

Lone worker

Maintaining the safety and well-being of lone workers and remote workforces is essential. Mobile Tornado's world-class lone worker makes it possible to quickly and easily track, locate and monitor employees as well as send emergency alerts to help protect their welfare and keep them safe.

Lone worker is a valuable safety feature for people who operate in remote areas or who work alone. It can be used in a variety of industries, including construction, manufacturing and transportation, and can help to prevent accidents and injuries, send assistance in the event of an emergency and provide peace of mind for workers and their supervisors.

Features of the Mobile Tornado lone worker solution

Push-to-alert

**Emergency
alerts**

**Keep alive
feature**

**Device
inactivity
monitoring**

**Detection of
falls, impacts,
still position**

**Automatic
events
recording**

Mobile Tornado's lone worker benefits

Increased employee safety

Lone worker can help to keep employees safer by monitoring them and sending alerts in the event of an emergency.

It enables employees to be periodically checked, in real time, either directly, via the application, or by detecting their behaviour using sensors on the device. These include if the device tilts, or is shaken or dropped, to detect falls. No movement/device inactivity or high speed can also be detected.

To use this checking feature, lone worker mode must be activated. It can be activated by either an on-screen button or an emergency button. As soon as it is activated, a timer starts and the system will begin to check on the employee by activating an alarm, at regular intervals. Parameters, including time between alarms, are defined in the dispatch console prior to activation.

If the employee does not respond to the alarm within a pre-defined length of time, the alarm is escalated to a dispatcher and an emergency event is triggered to enable help to be sent.

An employee can respond to the alarm to confirm that they are safe in a number of ways:

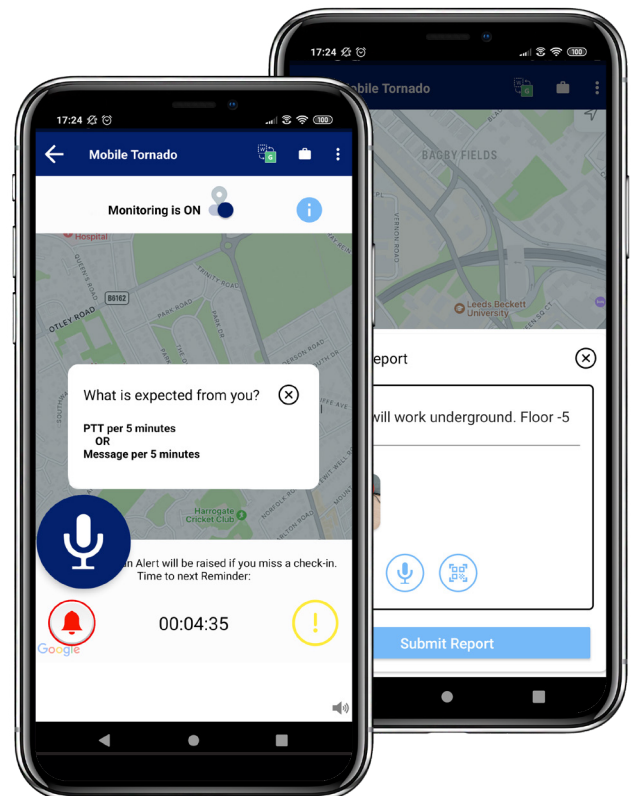

- Press the PTT button or instant message which goes to a default radio channel to indicate their safety
- Enter a PIN code
- Click the I am OK button

Peace of mind

Knowing that there is a way to monitor employees and get help in the event of an emergency is reassuring for lone and remote workers, their families and their employers.

Improved compliance

Lone worker can help businesses to comply with safety regulations by keeping employees safer and protecting their well-being.
