

Tornado**Debrief**

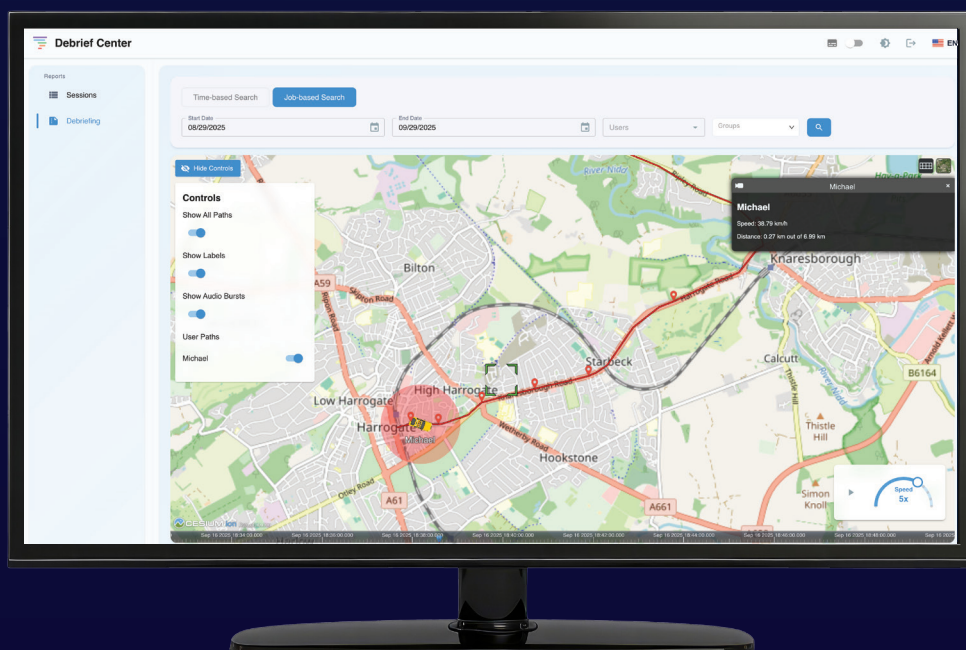

TornadoDebrief is the ultimate post-operation intelligence review platform, delivering instant access to real time location tracking data, recordings and full communication playback for PTT users and radio groups.

With the power to see exactly where employees have been and to review and replay conversations, command and control teams can reconstruct events and rebuild incident timelines in seconds, enabling them to respond decisively, and take control of any situation.

This next-generation post-operation review platform sets a new standard for clarity, accountability, and operational insight, empowering command and control centres to protect employees, enhance situational awareness, and drive operational excellence. It transforms business operations by improving decision making, boosting productivity, increasing efficiencies and resolving incidents faster and more accurately.

TornadoDebrief also features real-time transcription of live communications into multiple languages, breaking down language barriers, eliminating misunderstandings and enabling instant global coordination.

We are proud to be the first in the market to offer this cutting-edge feature, delivering a competitive advantage to our global partner network and setting a new benchmark for safety, accountability, and operational excellence.

Tornado**Debrief** is available to add to our **Basic** **Standard** and **Premium** plans

What is the TornadoDebrief and how does it work?

TornadoDebrief is a next-generation post-operation intelligence review platform. It collects and stores real-time location data, voice recordings, and full communication playback for PTT users and radio groups. This enables command and control teams to review, replay, and analyse operations with complete clarity.

Does TornadoDebrief support live transcription in multiple languages?

TornadoDebrief features real-time speech-to-text transcription in multiple languages, empowering organisations to break down language barriers and eliminate misunderstandings to enable seamless global coordination.

What makes TornadoDebrief different from other command and control tools?

Unlike traditional tools, TornadoDebrief offers instant incident timeline reconstruction, multilingual transcription, and full communication playback. This makes it easier for command and control centres to analyse events with confidence and improve decision-making.

How does TornadoDebrief boost productivity and improve operational efficiency?

By providing accurate location history, voice playback, and live communication transcripts, TornadoDebrief helps command teams make data-driven decisions quickly. This reduces delays, prevents misunderstandings and ensures faster incident resolution. It also provides a clear audit trail for reviews, training, and compliance.

How can TornadoDebrief enhance employee safety and accountability?

By providing an accurate record of actions and communications, TornadoDebrief helps protect employees in high-risk environments. Command teams can quickly playback incidents and review decisions, ensuring employee accountability. The clear audit trail provided by the Debrief Centre can also be used for employee training and compliance.

How does TornadoDebrief support incident investigations?

The ability to replay real-time communications provides a complete picture of events, allowing for accurate reviews and faster resolution of disputes or incidents. It also helps identify areas for improvement and supports employee training.

How does TornadoDebrief provide a competitive advantage to organisations?

TornadoDebrief delivers unmatched operational insight. By combining communication playback, real-time transcription, multilingual support, and instant incident timeline reconstruction in one seamless platform, the Debrief Centre enables teams to improve decision-making, reduce risk and increase employee safety.

Who can benefit from using a post-operation intelligence review platform?

TornadoDebrief is ideal for industries that rely on mission-critical communication. This includes public safety agencies, utilities and security, transportation and construction industries.

“Mobile Tornado’s commitment to continuous improvement is obvious in its PTT application which is head and shoulders above the competition. If you’re looking for a PoC partner, Mobile Tornado is unbeatable.”

Ragnar Trillo, Chief Technical Officer of TeamVOX
